

XMradio has been the most enjoyable radio experience I have had in years. We live in a part of MN that seems to offer very little in the way of music selections and, before buying XM radio, I had resorted to listening to CD's almost exclusively. Now I have options and actually enjoy driving. My husband and I travel to FL every winter and for the first time we can enjoy a variety of programming as well as traffic and weather advisories. I am requesting that you not take away options that we enjoy and reject the NAB's petition 04-160. We should be free to listen to what ever we wish!
